

CANYON ARC

LEARNING SYSTEMS

From expertise to performance.

CAPABILITY STATEMENT

Canyon Arc helps public-safety organizations build, review, and improve training that instructors can actually use.

CORE CAPABILITIES

Curriculum Review & Modernization

- Review objectives, content, assessments, sources, and instructor usability.
- Rebuild outdated or fragmented courses into usable, maintainable packages.

Curriculum Development

- Build lesson plans, instructor guides, student materials, and course maps.
- Align requirements, instruction, practice, and evaluation.

Assessment & Scenario Design

- Create test banks, answer keys, performance rubrics, and remediation criteria.
- Design scenarios around observable decisions and performance.

Prime & Subcontract Support

- Provide public-safety subject-matter expertise and curriculum-development support inside larger projects.

WHY CANYON ARC

Operational experience

Work is informed by direct public-safety and academy instructional experience.

Built for instructors

Deliverables are designed for the people who actually have to teach from them.

Performance focused

Objectives, practice, scenarios, and evaluation are treated as one system.

Founder led

Senior subject-matter and curriculum attention stays on each engagement.

REPRESENTATIVE EXPERIENCE - PRINCIPAL

- Academy curriculum modernization and instructional redesign
- Scenario-based active-violence and integrated practical training
- High-liability practical-skills instruction and performance evaluation
- Instructor evaluation and learner-assessment systems

FOUNDER & PRINCIPAL

Steven A. Brooks

Public-safety instructor and curriculum developer with more than 15 years of law-enforcement experience and extensive academy instructional experience.
